

Learn the Essential Tools and Techniques to Succeed in Route Development

Fundamentals of Route Development for Airports and Destinations

This course offers a comprehensive introduction to route development, as well as equipping delegates with practical tools and techniques to attract new routes and growth from airlines.

Learn more about how an air service network is the most critical element of an airport, including generating passenger and cargo volumes, aeronautical and non-aeronautical revenues as well as serving as a catalyst for local, regional and national economic growth.

Who should attend?

- Airport personnel with limited experience or new to the route development function
- Tourism professionals responsible for air service development
- Civil aviation authorities
- Government agencies and departments

Route Traffic Forecasting, Catchment Analytics, Data & Long-Term Forecasts

This course is aimed at practitioners who wish to learn the most up-to-date techniques to generate both short and long-term traffic forecasts, including how to utilize appropriate market data, understanding how successful your target route can be, and tips on how to pitch to the airlines.

Delegates will also learn different methodologies to produce both qualitative and quantitative forecasts while running practical "hands on" exercises

Who should attend?

- Airports – route development managers, analysts
- Airlines – new analysts, network planners
- Civil aviation authorities
- Government agencies and departments
- Personnel responsible for or interested in airport longterm forecasts.
